RE: BPA's BP-24 Rate Case and TC-24 Tariff Proceeding Kick-off Workshop

Powerex appreciates the opportunity to comment on the presentation and workshop material from April 27, 2022, regarding the BP-24 Rate Case and TC-24 Tariff Proceeding Kick-off Workshop. In response to the requested feedback on the Attachment C: Long Term ATC topic, Powerex has a slight preference for Alternative B regarding the frequency of the commercial powerflow studies. Powerex also prefers Alternative B from a transparency perspective so that customers and stakeholders have the most up to date information, data, input, and outputs.

Powerex also has one clarifying question that was not addressed during the presentation. Is there a deadline for topics to be considered under BP-24 or TC-24, or can customers raise topics anytime during the pre-rate case workshop process?

Thank you kindly for considering our comments.

Sincerely,

Raj Hundal
Director, Market Policy and Practices
